

REJUVENATE

FACIAL CREAM • *Fragrance Free*

HPR RETINOID + CBD

HPR RETINOID PROPERTIES

- ① **Hydroxypinacolone Retinoate:** HPR is a next-generation, esterified Vitamin A derivative
- ② HPR binds directly to skin receptors without needing conversion.
- ③ HPR offers the high efficacy of retinoic acid for anti-aging, acne, and collagen synthesis, but with minimal irritation and high stability.
- ④ HPR is 10X more potent without the typical retinol irritation.
- ⑤ HPR is a smart choice for all skin types, including sensitive.
- ⑥ Retinol and CBD complement each other.

CBD PROPERTIES

- ① CBD (cannabidiol) is used for wrinkles due to its antioxidant and anti-inflammatory properties, which may combat free-radical damage, reduce skin inflammation, and potentially improve collagen levels to reduce fine lines. It is often used in topical creams and serums to enhance skin elasticity and firmness.
- ② **Antioxidants:** CBD contains antioxidants that combat free radical damage, which contributes to visible signs of aging like wrinkles and sagging.
- ③ **Anti-inflammatory:** It calms inflammation, which helps reduce the breakdown of collagen and elastin, maintaining skin firmness.
- ④ **Skin Improvement:** Studies have shown that topical application of CBD can lead to improved skin elasticity, hydration, and a reduction in wrinkles over time, with one study showing a 15% reduction after 56 days.
- ⑤ **Retinol Companion:** When combined with retinol, CBD can mitigate irritation while aiding in improving the skin's appearance.

TIPS FOR USAGE

Topical Application: Use cream on clean, damp skin.

- A Daily application, both morning and night, is typically recommended.
- B It can be used alone or under moisturizer/makeup.
